

Now you can enjoy printing without complex printer drivers. Mirage is available for the latest Epson Stylus Pro printers.

Work faster and more efficiently with the most advanced professional plug-in for Adobe®. Mirage makes things simple by giving you all the features, tools and settings you need in one well-arranged layout. Just push the print button and start printing in seconds.

Enjoy support for all the colour modes you work with, even if there are mixed modes like RGB and CMYK in one document. Save time and paper and **enjoy unlimited print length** – if Photoshop® or InDesign® can handle the file then Mirage can print it.

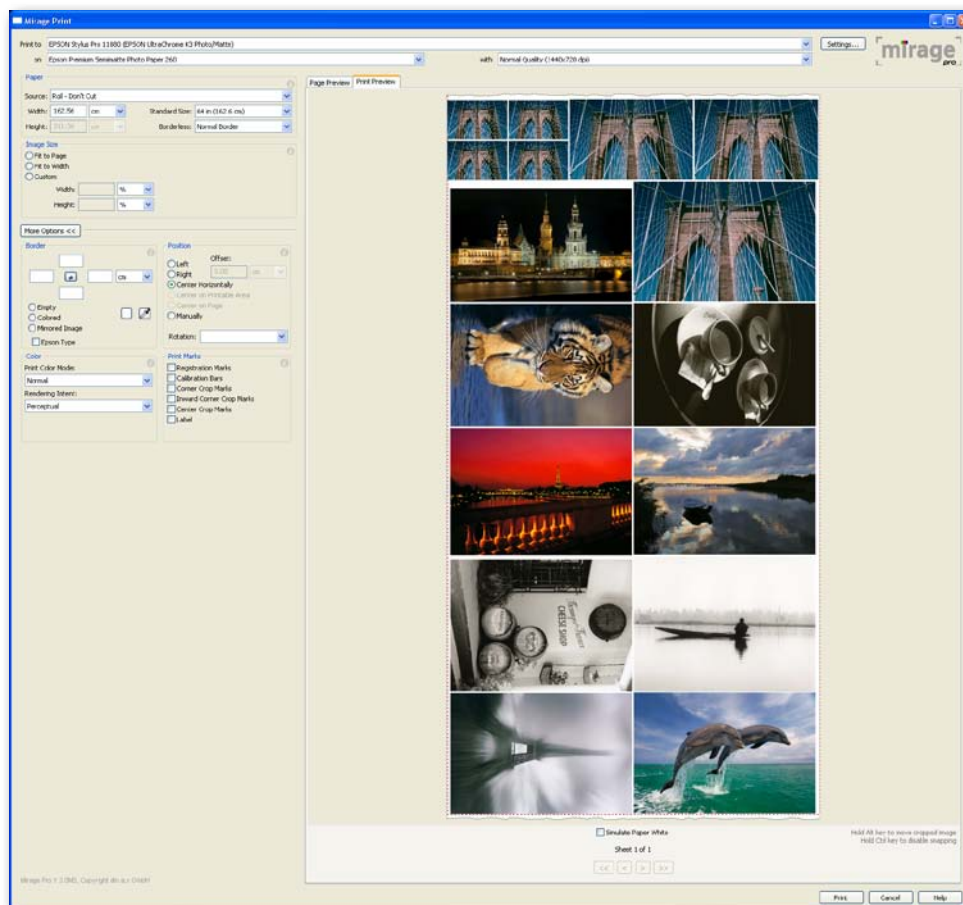

NEW: Nesting - Print several images (Photoshop) or pages / spreads (InDesign) at the same time.

...creating professional ICC profiles has never been that easy!

Mirage **Pro** is the professional extension to the Mirage Master- & Premium Edition. The Mirage Pro extension adds support for the Epson SpektroProofer device to enable creation of ICC color profiles with ease.

The Mirage **Pro** wizard will automatically layout and print the measurement color patches, dry the print with the SpectroProofer's built in fan, measure the color patches utilizing SpectroProofer's x-rite measurement device and create professional ICC profiles for you.
